Gamal Sayed

+20 1144651667 | gamal.sayedahmedmuhammed@gmail.com | linkedin.com/in/1gamal-sayed | Portfolio | Cairo, Egypt

PROFESSIONAL SUMMARY

Data Engineer with hands-on experience designing ETL pipelines, data warehouses, and cloud-based data solutions using SQL Server, SSIS, Azure, and Power BI. Experienced in building scalable data workflows, database optimization, and transforming raw data into business insights. Strong foundation in SQL, Python, cloud technologies, and machine learning, with practical experience through DEPI, academic projects, and real-world training. Passionate about building reliable, efficient, and data-driven solutions.

EDUCATION

Helwan University 2021 – 2025
B.Sc. Computer Science, Faculty of Computers and AI – GPA: 3.39 Cairo, Egypt

EXPERIENCE

iSchool Jul. 2026 – Present
Instructor – DEMI & DECI Programs Cairo, Egypt

- Deliver technology and coding curriculum across grade levels for the **Digital Egypt Marvels Initiative (DEMI)** and **Digital Egypt Cubs Initiative (DECI)**
- Facilitate hands-on sessions covering Python/mBlock, VEXcode VR robotics, MIT App Inventor, cybersecurity fundamentals, and AI/ML concepts, adapting content for different age groups
- Design fully scripted facilitation materials and classroom exercises to ensure consistent, high-quality delivery across multiple student cohorts

Digital Egypt Pioneers Initiative (DEPI) Apr. 2024 – Oct. 2024
Microsoft Data Engineer Trainee Cairo, Egypt

- Built **ETL pipelines** using SQL Server, SSIS, and Azure, reducing manual data processing time by consolidating multiple reporting workflows into a single automated pipeline
- Designed **star-schema data warehouses** serving 3+ business domains, enabling faster query performance and consistent metrics across analytical dashboards
- Developed **Power BI dashboards** and automated cloud workflows, cutting reporting turnaround from days to near real-time for stakeholder decision-making

National Telecommunication Institute (NTI) Jul. 2023 – Aug. 2023
AI Trainee Cairo, Egypt

- Completed an **AI & IoT internship** developing end-to-end anomaly detection pipelines that processed sensor data streams and flagged irregular patterns in real time
- Implemented and tuned **machine learning models** for IoT anomaly detection across multiple sensor types, iterating on feature engineering to improve prediction reliability
- Delivered a fully functional AI/IoT solution within a one-month timeline, earning a final evaluation score of **90/100** and recognition for technical depth and code quality

PROJECTS

CareView | *AI Healthcare Platform – Python, NLP, CV*

- Built an **NLP chatbot** and **pose-estimation system** tailored for healthcare use cases
- Implemented scheduling, payments, and inventory modules for a full-featured platform

Traffic Monitoring Analytics | *Azure, SSIS, Power BI*

- Built **ETL pipelines** and an **ML forecasting model** achieving **95% accuracy**
- Created real-time **Power BI dashboards** to deliver actionable analytics insights

AI/IoT Anomaly Detection System | *Python, Machine Learning* – NTI

- Developed an end-to-end anomaly detection pipeline processing sensor data streams and flagging irregular patterns in real time
- Implemented and tuned **machine learning models** across multiple sensor types, achieving a final evaluation score of **90/100**

courses and certifications

- **Data Engineer Track**, DataCamp – 2025
- **DEPI Achievements**: Excellence Award, Best Team Leader, Soft Skills – 2024
- **Machine Learning Specialization** – Stanford & DeepLearning.AI – 2023

SKILLS

Programming Languages: SQL, Python, C#, Java, PostgreSQL, SQL Server

Tools & IDEs: Visual Studio, Pentaho, SSIS, Power BI, Figma

Cloud & AI: Microsoft Azure, AWS, Machine Learning, NLP, Computer Vision

Microsoft Fabric: Lakehouse, Delta Lake, Data Pipelines, Dataflows Gen2, Spark Notebooks (PySpark), KQL/Eventhouse, OneLake security, CI/CD (Git integration, deployment pipelines)
