PROFESSIONAL SUMMARY

Data Engineer (B.Sc. Computer Science, 2025) building ETL/ELT pipelines, star-schema data warehouses, and Power BI reporting on SQL Server, SSIS, Azure, and Microsoft Fabric. Completed the Microsoft Data Engineer track at DEPI (Excellence Award, Best Team Leader) and delivered end-to-end Fabric projects covering Lakehouse, Warehouse, pipeline orchestration, and semantic modeling.

EXPERIENCE

iSchool Jul. 2026 – Present
Instructor – DEMI & DECI Programs Cairo, Egypt

- Teach Python, robotics, app development, cybersecurity, and AI/ML fundamentals across grade levels in two national digital-literacy initiatives
- Authored fully scripted facilitation materials that standardize delivery across student cohorts

Digital Egypt Pioneers Initiative (DEPI) Apr. 2024 – Oct. 2024
Microsoft Data Engineer Trainee Cairo, Egypt

- Consolidated multiple reporting workflows into a single automated **ETL pipeline** (SQL Server, SSIS, Azure), reducing manual data processing
- Designed **star-schema data warehouses** across 3+ business domains, standardizing metrics across analytical dashboards
- Developed **Power BI dashboards** and automated cloud workflows, cutting reporting turnaround from days to near real-time
- Earned the program's **Excellence Award** and **Best Team Leader** recognition
- Completed **freelance data engineering projects** alongside the DEPI program, applying Microsoft data engineering technologies to real-world client requirements

National Telecommunication Institute (NTI) Jul. 2023 – Aug. 2023
AI Trainee Cairo, Egypt

- Built an end-to-end Python **anomaly-detection pipeline** on IoT sensor streams that flagged irregular patterns in real time; scored **90/100** on the final program evaluation

PROJECTS

Telecom Customer Analytics | *SQL, Power BI, DAX* GitHub

- Modeled telecom customer, subscription, consumption, call, payment, and mobile-app data into a **Power BI star schema**, with a SQL query producing one row per customer across multiple fact tables
- Built a DAX KPI layer (Total/Active Customers, % of total by plan) and an executive dashboard, with customer segmentation and an ML use case

Sales Star Schema | *Microsoft Fabric, T-SQL, Power BI* GitHub

- Loaded sales orders from Lakehouse staging into a Warehouse star schema (Fact_Sales, Dim_Customer, Dim_Item) via a stored procedure; built the Semantic Model and Power BI report on top

DEPI SSIS Tasks | *Microsoft Fabric, T-SQL, Power BI* GitHub

- solutions to 28 SSIS (SQL Server Integration Services) exercises from the Wise Owl website. Each exercise tackles various SSIS concepts and functionalities, and the solutions provided here are aimed at reinforcing those skills.

Traffic Monitoring Analytics | *Azure, SSIS, Power BI* GitHub

- Built ETL pipelines and an ML forecasting model with **95% accuracy**, delivered through real-time Power BI dashboards

SKILLS

Data Engineering: ETL/ELT, Data Warehousing, Dimensional (Star-Schema) Modeling, Medallion Architecture, Pipeline Orchestration

Languages & Databases: SQL (SQL Server, PostgreSQL), Python (PySpark), C#, Java

Microsoft Fabric: Lakehouse, Warehouse, Delta Lake, Data Pipelines, Dataflows Gen2, Spark Notebooks, KQL/Eventhouse, OneLake Security

Cloud, BI & DevOps: Azure, AWS, Power BI, SSIS, Pentaho, CI/CD (Git integration, deployment pipelines)

CERTIFICATIONS

- **Data Engineer Track**, DataCamp – 2025 | **Machine Learning Specialization**, Stanford & DeepLearning.AI – 2023
